PROFESSIONAL SUMMARY

Software engineer building production-grade **backend systems**, **real-time applications**, and **AI-enabled products** with **Python**, **TypeScript**, **FastAPI**, and **React**. Experienced in **workflow orchestration**, **WebSockets**, and scalable service design, with open-source contributions to **Zulip** and **OpenWISP**, **150+** **LeetCode** problems solved across data structures and algorithms, and a strong focus on clean, reliable engineering.

EDUCATION

Bachelor of Technology in Artificial Intelligence

Newton School of Technology, Rishihood University

Aug 2024 – May 2028

CGPA: 8.33/10.0 (Top 10% of cohort)

SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Backend & Web: FastAPI, Django, Node.js, React, Next.js, REST APIs, WebSockets

Databases & Systems: PostgreSQL, MongoDB, Docker, System Design, OOP, Git

AI/ML: LangGraph, LangChain, Google ADK, Gemini APIs, Machine Learning, Deep Learning, NLP

PROJECTS

RouteGenie – AI-Powered Real-Time Navigation System [\[GitHub\]](#) [\[Demo\]](#)

- Built a voice first navigation system using **Gemini Live**, **Google ADK**, **FastAPI**, and bidirectional **WebSockets**, enabling real time audio interaction, route planning, and stop insertion with streamed responses.
- Designed the backend around async task handling, route caching, Google Maps integration, and **PostgreSQL**-backed history/auth flows, improving reliability, maintainability, and production readiness for real time usage.

AutoWeave Library – Multi-Agent Workflow Orchestration Framework [\[GitHub\]](#)

- Developed a terminal first multi-agent orchestration library in **Python** that manages canonical workflow state, **DAG scheduling**, approvals, artifacts, routing, and context services for long running AI workflows.
- Shipped developer facing **CLI** and monitoring surfaces including bootstrap, validation, and diagnostic commands with a lightweight local UI, integrating **OpenHands** worker runtime and **Vertex AI** with a strong focus on observability and modular design.

CERTIFICATIONS

AI Engineering Agentic Track — Udemy [\[Certificate\]](#)

Hands-on work with multi agent orchestration, tool-using workflows, debugging pipelines, and AI deployment.

Alfaleus Full-Stack Bootcamp — Alfaleus Tech [\[Certificate\]](#)

Built and deployed full-stack applications with backend APIs, testing, and production oriented development practices.

Web Developer Bootcamp — Udemy [\[Certificate\]](#)

Strengthened fundamentals in web development, RESTful services, frontend-backend integration, and delivery.

ACHIEVEMENTS & EXTRACURRICULAR

Zulip Open-Source Contributor

Designed and shipped production-level full-stack contributions across **Python/Django** backend systems and **React** frontend components, collaborating with global maintainers through **GitHub** pull requests, testing, structured code reviews, and iterative feature refinement across the stack.

India AI Summit 2026 Buildathon — HCL & GUVI [\[Certificate\]](#)

Built a multi-agent honeypot system using **LangGraph** with a **FastAPI** backend and **React** frontend, autonomously engaging attackers through coordinated agent workflows and placing in the **Top 10 out of 1000+ teams**.
